NOTES: Actual fares from National Rail Enquires on 23 December 2013.

2011 CPI fare figure derived from 2011 actual fare minus difference between July 2010 RPI and CPI (1.7%). This approach was used as it is the July RPI figure from the previous year which is used to set annual regulated rail fares.

2011 is used as a base year for comparisons as it is the first year in which the present administration could control the level of regulated rail fares

London fares are for a 12 month standard class season ticket to London terminals via any permitted route. They do not include onward travel costs such as Travelcard.
